Early 2024

Experience

UX Researcher

Information Science for Healthcare Lab (IS4H)

2022-present

I have programmed code to process data for cluster analysis, conducted interviews with healthcare professionals, designed workshops, and reviewed trauma resuscitations in partnership with Children's National Hospital to help design alerting and detection systems within Emergency Rooms.

Data Visualization

Harvard Medical School, Department of Population Medicine

2021-2022

I worked under Professor Stephen B. Soumerai, ScD, creating and editing visual representations of the effects of the FDA advisories on medical outcomes.

Data Visualization Scientist

Social Research Corporation

2021-2022

I processed and organized data, then created visual representations to convey ideas so that they could be understood quickly and accurately.

Graphic Design

University at Buffalo (SUNY), Department of Biomedical Informatics

2020-2021

I worked on proposal development, and representations of departmental outcomes. My work included writing, formatting, editing, photo editing and graphics creation.

Illustration and Graphic Design. Freelance Work

2019-2023

I worked for clients as a freelance illustrator and graphic designer.

Album/Single art, Portraiture, Editorial Illustration, Graphic Design, Data Visualization

Software

UX Figma, Adobe XD, Invision

Coding Java, C

2D adobe suite

3D Blender, ZBrush

Skills

Wire framing, User Research, Data analysis, Research Protocol Creation and Implementation, Design Thinking, Data Visualization, Drawing, Graphic Design, Digital Painting and 3D Modeling, Excellent communication skills. I learns new tools and software very quickly.
